

## GRAZING CONFERENCE HISTORY

**Steve Campbell** has been around cattle for years and has spent the last 23 years learning to not only change his personal eating habits and extrapolate those learned principles of nature into his own farm-land and animals, but also to help others make similar improvements on their farms and with their families health. He teaches visual observation of butterfat and meat tenderness characteristics which will help improve animals and keep money in your pocket.

*The Southern Iowa Grazing Conference* exists to provide an educational and inspiring environment with information about life on the farm, especially life on a cattle farm. The event is for all ages and all levels of experience. It is an opportunity to network and learn from other grazers in Iowa and beyond; and to inspire and be re-inspired about the work we commit to on our farm.

For the past 10 years, a dedicated team of us in southern Iowa have been doing all the behind the scenes work. We are very excited about how much the conference has grown and hope to watch it continue to be a place where knowledge and ideas can be shared between fellow farmers and ranchers of all kinds. At our 2022 conference we were grateful to have 200 attendees and 21 vendors.

~Steven Gingerich, Eli Schrock, Ivan Mast, Emanuel Troyer, and Henry Troyer
